"Stem Cell Research Laboratory in KRIBB"

The mission of our research is to advance the basic and translational stem cell research into noble regenerative therapies based on pluripotent stem cell and cellular reprogramming technology. Our team is mainly focused on the development of innovative interdisciplinary approaches to control the fate of stem cells and devise original clinically applicable cell- and tissue- based products.

(Internship Field)

The internship will be involved in the development of somatic cell reprogramming technology to generate functional human cells.
The student will actively engaged in stem-cell based research activities and on-going projects.
